

Salam Doctor (سلام دکتر) is a Persian, RTL web platform that connects patients in Shiraz with vetted clinics and specialists. It combines a searchable clinic directory, consultation lead capture, live chat, and service landing pages — designed for fast deployment, low operating cost, and easy content updates.

29+

Clinics listed

5,000

Monthly visits (plan)

RTL

Persian-first UX

24/7

Lead + chat intake

WHAT IT DOES

- Directory of beauty & medical clinics in Shiraz
- Category browsing (hair, skin, laser, surgery, etc.)
- Individual clinic profiles with services & contact
- Consultation request form → stored as leads
- Real-time chat widget + Bale messenger link
- Landing pages: home visit, lab, equipment rental

WHAT IT IS NOT

- Not an EMR or hospital information system
- Not online appointment scheduling (yet)
- Not payment / insurance processing
- Not a native mobile app
- Clinic data is not a dynamic CMS — edited in code

TECHNOLOGY STACK

Frontend	HTML5, CSS, vanilla JavaScript (no React/Vue). Swiper.js carousels. Local Persian fonts (Vazirmatn, IRANSans).
Backend	Node.js (native http), SQLite (better-sqlite3), Socket.IO for live chat.
Hosting	Docker Compose: Nginx (static + reverse proxy) + Node backend. HTTPS via Let's Encrypt.
Data	Clinics in data.js; leads in SQLite leads.db.

ARCHITECTURE

```
Visitor → Nginx (443) → Static HTML/CSS/JS
      ↓
      /api/* → Node.js :3000 → SQLite
      /socket.io/ → In-memory chat sessions
      ↓
      admin.html (Basic Auth) → leads + chat panel
```

KEY PAGES & APIS

[index.html](#) [category.html](#) [profile.html](#) [admin.html](#)

- POST /api/consultation — save lead (name, phone, service)
- GET /api/leads — list leads (protected)
- GET /api/health — uptime check
- WebSocket /socket.io/ — visitor ↔ admin chat

BUSINESS MODEL (TYPICAL)

- Referral / introduction — match patients to partner clinics
- Lead generation — consultation forms & chat captured centrally
- Brand trust — curated directory positions
Salam Doctor as a local authority
- Service expansion — home care, lab, equipment rental as additional verticals

ROADMAP & GROWTH LEVERS

- Migrate clinics to a proper database / admin CMS
- Persist chat history; optional CRM integration
- SMS / WhatsApp / Bale notifications on new leads
- Online booking with clinic calendars
- Reviews & ratings; SEO for each clinic profile
- Expand beyond Shiraz; partner onboarding portal
